Front-End Developer III

Department: EL: Software Engineering, Robert W. Woodruff Library

Salary: Commensurate with qualifications and experience

Position Availability: Immediately (Full Remote)

Job Description

Emory University Libraries is looking for a Front-End Developer to help initiate and implement creative and impactful uses of technology. Reporting to the Lead Software Engineer in the Library Technology and Digital Strategies department, the Front-End Developer will contribute to the theming, branding and development of interfaces for the libraries’ web sites, discovery products and the institution’s preservation repository.

Key Responsibilities

• Contributes to the design of library systems.
• Assists in developing library applications.
• Supports existing applications.
• Tests new development.
• Identifies training needs.

Professional Responsibilities

• Maintains up-to-date professional knowledge and skills in areas related to primary job assignment as well as maintains general knowledge of current trends in higher education, academic libraries, and information and educational technology.

Preferred Qualifications

• Experience with Content Management Systems such as Drupal.
• Experience with CSS, HTML5, Javascript and Bootstrap
• Familiarity with Blacklight and/or Samvera Community gems and applications.
• Experience working on Open-Source software projects or with remote collaborators.
• Familiarity and desire to work with agile methods.
• Familiarity with version control, test-driven development, continuous integration techniques and other development best practices.
• Experience working in a library environment.
• Evidence of capacity for professional development, involvement, and contribution.
• Excellent oral and written communication skills as well as analytical and organizational skills.
**University Job Description:**

 Coordinates the development and maintenance of interfaces for products and systems that make services and resources accessible and discoverable. Consults with stakeholders to understand business problems and develop requirements for front-end solutions. Analyzes and resolves problems resulting from fixes and upgrades. Provides technical direction to customers and mentors junior staff. May lead small projects related to front-end solutions or user interfaces and/or resolve software issues for business related problems. Performs related responsibilities as required.

**University Minimum Required Qualifications:**

 A bachelor's degree and four years of experience or experience in front-end development, web design, or a related field or an equivalent combination of education, training and experience. Positions in this classification may require a knowledge of one or more programming languages and/or a knowledge of an application and application tools.

**Application Procedures**

 Interested candidates should review the applications requirements and apply online at

 Review of applications will continue until position is successfully filled. Emory is an Equal Opportunity/Affirmative Action Employer that welcomes and encourages diversity and seeks applications and nominations from women and minorities.

**Diversity Statement**

 Emory Libraries recognize diversity, equity, and inclusion as core values integral to achieving our mission to enrich the quality of life and advance intellectual discovery by connecting people of diverse backgrounds and experiences. We champion an inclusive work environment through competency training, reassurance of personal growth, restorative communication practices, and diverse recruitment and retention. We offer exhibits, collections, programming, and research assistance that speaks to the rich needs and identities of patrons from the Emory community and beyond. We encompass opportunities that strengthen these values. We invite you to bring your true self to the library and feel welcomed when you arrive.
